Column 1:

The content of this column is going to be a paragraph. From my initial tests, it appears that Sypht is good at working with short pieces of text and clear instances of value pairs, but is not as good with long sections of text. Despite discovering this, it seems unlikely that this is a problem for the types of document that Sypht is designed to work with.

Hello	This
File	Is
Meant	To
Be	A
Test	Document

Column 2:

Sypht also appears to have some trouble with columns.

Title 1:   Value 1

Title 2: *Value 2*

Title 3: Value 3

<u>Title 4:</u> Value 4

Title 5:   **Value 5**

Title 6: 6th Value

Title 7: Value 7

Having	Multiple
Tables	Helps
To	Identify
If	They
Are	Confused

Drafter's Name:

Angus Berg

Column 3:

Having trouble coming up with more empty test data.

List of data:

- Item 1
- Item 2
- Item 3
- Item 4

A long title that will be split over two lines:

- Longer, split-line item 1
- Longer, split-line item 2
- Longer, split-line item 3
- Longer, split-line item 4
